BAYHAVEN LIMITED

The best builders we have ever worked with.

It is no exaggeration to say that Bayhaven have met and surpassed all of our expectations in the building experience.

We have used them now on several major projects, of building, restoration of a medieval barn which is now a five star holiday cottage and renovation of offices, stone wall building, roofing and joiner work.

The secret for Kevin, Mick and Dave is that they don't use sub-contractors. Between them they are skilled in every aspect of building and it shows. Nothing is a problem for them and they are extremely competitive on price.

They work with a smile on their face, are always positive and just a joy to have around when you need anything from a new build house to a major extension or renovation.

Additionally, they work with excellent professionals on architecture, building control and certification of their gas and electric installations.

Top marks to Bayhaven Ltd., from Dave and Lil and we would be happy to show any future or prospective customers just what these guys can do.

Dave and Lil Cassie
